

AUTHOR GUIDELINES

COLORATION TECHNOLOGY

The editor welcomes submission of papers on coloration and topics covering the science and technology of coloured materials.

Manuscript Types Accepted

Full papers: Papers containing original scientific work will be selected for inclusion in a particular issue of *Coloration Technology* sequentially in order of date of acceptance. Authors should note that the fragmentation of a substantial body of work into a number of short publications is strongly discouraged; if a paper is submitted as part of a series, any previous 'parts' should be indicated in a footnote or cited in the reference list.

Short communications: There is a fast track procedure for short papers submitted via the accelerated publication procedure (APP). If authors wish their paper to be considered for APP, they must provide a statement clarifying this and submit a manuscript according to specific guidelines (<http://www.sdc.org.uk/publications/app.htm>).

Review papers: Authoritative review articles are also included. These are normally published by invitation of the Publications Committee. However, uncommissioned review articles are welcomed, as are suggestions for review articles from authors. Enquiries regarding potential review articles should be directed to the managing editor (editorial@sdcc.org.uk).

Please read the instructions below for brief details on the Journal's requirements for manuscripts. Please visit the Journal Information link at www.interscience.wiley.com/journal/colorationtechnology for full and updated Author Guidelines. Manuscripts in an incorrect format may be returned to the author.

MANUSCRIPT SUBMISSION

Coloration Technology has now adopted ScholarOne Manuscripts™ for online manuscript submission and peer review. The new system brings with it a whole host of benefits including:

- Quick and easy submission
- Administration centralised and reduced
- Significant decrease in peer review times

From now on all submissions to the journal must be submitted online at <http://mc.manuscriptcentral.com/cte>. Full instructions and support are available on the site and a user ID and password can be obtained on the first visit. If you require assistance then click the Get Help Now link which appears at the top right of every ScholarOne Manuscripts™ page. If you cannot submit online, please contact the managing editor (editorial@sdcc.org.uk).

MANUSCRIPT FORMAT AND STRUCTURE

All manuscripts submitted to *Coloration Technology* should normally include:

Abstract: A summary (up to 150 words) which is sufficiently detailed to provide a broad indication of the field covered and the results obtained.

Main Text: An 'Introduction' which describes the aims of the investigation; an 'Experimental' section outlining the methods used; a 'Results and Discussion' section; and in the 'Conclusions' section a summary of the conclusions drawn should be outlined. In all papers, but in particular those describing theoretical studies, it is desirable that the aims and objectives of the work and any conclusions drawn should be stated as clearly as possible in terms of practical coloration.

Acknowledgements: If included, this section should be kept brief and inserted immediately above the list of references.

References

The Journal follows the Vancouver Style. For full details, please see the Journal Information link at www.interscience.wiley.com/journal/colorationtechnology. We recommend the use of a tool such as EndNote or Reference Manager for reference management and formatting.

EndNote reference styles can be searched for here: www.endnote.com/support/enstyles.asp

Reference Manager reference styles can be searched for here: www.refman.com/support/rmstyles.asp

Tables, Figures and Figure Legends

Tables: Tables should only be used to clarify important points and must, as far as possible, be self-explanatory. The tables should be numbered consecutively with Arabic numerals and cited at a relevant position in the text.

Figures: Figures, schemes and chemical structures should be numbered consecutively and should be cited at a relevant position in the text. In a complex reaction scheme, chemical structures should be numbered serially (1, 2, etc.) following the reaction sequence. The number of illustrations should be kept as low as possible and the results should be presented in the form of tables or graphs, not both. Diagrams illustrating well known apparatus, techniques or results should not be included. If illustrations are not discussed adequately in the text, they may be removed at the editing stage. Captions should be provided for all tables and figures.

If all or parts of previously published illustrations are used, permission must be obtained from the copyright holder concerned. It is the author's responsibility to obtain these in writing and provide copies to the publisher.

All figures and artwork must be provided in electronic format. Please refer to the Journal Information link at www.interscience.wiley.com/journal/colorationtechnology for detailed information.

Colour Charges: Owing to the high cost of reproducing illustrations, it may be necessary to pass on to authors charges incurred for large numbers of illustrations, when diagrams do not conform to the specifications given, when they are more than usually complex, or when colour is required. If this proves necessary, authors will be notified beforehand.

Supplementary Material: Supplementary Material, such as data sets or additional figures or tables, that will not be published in the print edition of the journal, but which will be viewable via the online edition, can be submitted. Authors need to work closely with the editor in developing or using such new publication formats.

ACCEPTANCE OF A MANUSCRIPT FOR PUBLICATION

Copyright: Upon acceptance of a paper, authors are required to assign the exclusive licence to publish their paper to Blackwell Publishing. Assignment of the exclusive licence is a condition of publication and papers will not be passed to the publisher for production unless licence has been assigned. (Papers subject to government or Crown copyright are exempt from this requirement; however, the form still has to be signed.) A completed Exclusive Licence Form must be sent to the address specified on the form, before any manuscript can be published. Authors must send the completed original Exclusive Licence Form by regular mail, email (editorial@sdcc.org.uk) or fax [+44 (0)1274 392888] upon receiving notice of manuscript acceptance, i.e. do not send the form at submission.

Permissions: If all or parts of previously published illustrations are used, permission must be obtained from the copyright holder concerned. It is the author's responsibility to obtain these in writing and provide copies to the Publisher.

Proofs: The corresponding author will receive an email alert containing a link to download their proof as a PDF (portable document format). Corrections must be returned to the production editor within 3 days of receipt.

Offprints: A PDF offprint of the online published article will be provided free of charge to the corresponding author, and may be distributed subject to the publisher's terms and conditions. Authors have permission to make multiple copies of this document for private use, but not for resale or web use, provided the source of the article is included in all copies used.

Additional paper offprints may be ordered online. Please go to www.offprint.cosprinters.com/cos/bw/main.jsp?SITE_ID=bw&FID=USER_HOME_PG, fill in the necessary details and ensure that you type information in all of the required fields.

If you have queries about offprints please email offprint@cosprinters.com

Author Services – Online production tracking is now available for your article through Wiley-Blackwell's Author Services: Author Services enables authors to track their article – once it has been accepted – through the production process to publication online and in print. Authors can check the status of their articles online and choose to receive automated emails at key stages of production. The author will receive an email with a unique link that enables them to register and have their article automatically added to the system. Please ensure that a complete email address is provided when submitting the manuscript. Visit <http://authorservices.wiley.com/> for more details on online production tracking and for a wealth of resources including FAQs and tips on article preparation, submission and more.
