

Colour Index Heritage Edition

Contents

The Colour Index Heritage Edition is a compilation of all the available information published in the various editions of the Colour Index between 1924 and 2000. It contains over 17,000 pages of application, chemical and commercial information relating to dyes and pigments, published over 77 years. It presents a fascinating insight into the international development of the colorant industry during this period. It is published on DVD with scanned, searchable pages in portable document format (PDF).

The following pages list the contents of the DVD and the number of pages allocated to each section in the various editions.
